EXAMINER

KE, PENG

ART UNIT PAPER NUMBER

2174

DATE MAILED: 10/06/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

**Office Action Summary**

Application No.

09/770,337

Applicant(s)

MAGENDANZ ET AL.

Examiner

Peng Ke

Art Unit

2174

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 19 July 2006.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-27 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-27 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

### **DETAILED ACTION**

This action is responsive to communications: Amendment, filed on 19 July 2006.

Claims 1- 27 are pending in this application. Claims 1, 14, and 27 are independent claims. In amendment filed on 2/03/05, claims 14 and 27 were amended.

### **Claim Rejections – 35 USC § 103**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kotick et al., U.S. Patent No. 6,559,867 in view of Buxton et al., U.S. Patent No. 6,469,714.

As per claim 1, Kotick et al. (hereinafter referred to as Kotick) teach a method for providing a selection of properties for an electronic document associated with an application program comprising the steps:

determining a status of a property for the electronic document (see Kotick, column 5, lines 15-30)

based upon the status of the property, creating a customized palette for the user interface so that the palette comprises a control for an available property (see Kotick, column 5, lines 15-30); and

displaying the palette in conjunction with the electronic document on the user interface such that said palette and active associated content of the palette does not

Art Unit: 2174

obscure viewing of said electronic document (see figure-2, items 51-53, figure-3, 71-81; column 5, lines 15-30).

However, Kotick fails to teach determining a context for the electronic document, and customizing palette based upon the context of the electronic document;

Buxton teaches determining a context for the electronic document and customizing palette based upon the context of the electronic document (see Buxton, column 2, lines 61 – 67)

It would have been obvious to an artisan at the time of the invention to include Buxton's teaching with method of Kotick in order to provide users with a system that adapts to their needs.

As per claim 2, which is dependent on claim 1, Kotick and Buxton teach the method of claim 1 (see rejection above). Buxton further teaches determining a change in the status of the property or the context of the electronic document (see Buxton, column 8, lines 20 – 25);

based upon the change of the property or the change in the property or the change in the context of the electronic document,

modifying the palette to reflect the change in the property or the change in the context of the electronic document (see Buxton, column 8, lines 20 – 25); and

replacing the palette with the modified palette so that the modified palette is displayed in conjunction with the electronic document on the user interface (see Buxton, figure 3A, items 300 and 320 and column 8, lines 20 – 25).

As per claim 3, which is dependent on claim 1, Kotick and Buxton teach the method of claim 1 (see rejection above). Buxton further teaches sizing the palette so that the palette and the electronic document can be simultaneously viewed (see Buxton, figure 3A, items 300 and 320 and column 9, lines 55 – 67).

As per claim 4, which is dependent on claim 2, Kotick and Buxton teach the method of claim 1 (see rejection above). Buxton further teaches sizing the modified palette so that the palette and the electronic document can be simultaneously viewed (see Buxton, figure 3A, items 300 and 320 and column 9, lines 55 – 67).

As per claim 5, which is dependent on claim 1, Kotick and Buxton teach the method of claim 1 (see rejection above). Buxton further teaches coordinating the palette with a predefined interface so that the palette and the predefined interface provide consistent control features (see Buxton figure 2, figure 3A, items 300 and 320 and column 6, lines 43 – 58); and

displaying the predefined interface in conjunction with the palette and the electronic document (see Buxton figure 3A, items 300 and 320).

As per claim 6, which is dependent on claim 2, Kotick and Buxton teach the method of claim 2 (see rejection above). Buxton further teaches coordinating the modified palette with a predefined interface so that the palette and the predefined

Art Unit: 2174

interface provide consistent control features (see Buxton figure 2, figure 3A, items 300 and 320 and column 6, lines 43 – 58); and

displaying the predefined interface in conjunction with the modified palette and the electronic document (see Buxton figure 2, figure 3A, items 300 and 320 and column 6, lines 43 – 58).

As per claim 7, which is dependent on claim 1, Kotick and Buxton teach the method of claim 1 (see rejection above). Buxton further teaches that the context of the electronic document consists of at least one of the following: textual content, formatting content, or graphical content (see Buxton, column 8, lines 30 – 36).

As per claim 8, which is dependent on claim 1, Kotick and Buxton teach the method of claim 1 (see rejection above). Buxton further teaches that the property consists of one of the following: a formatting command, an application program command, or an electronic document characteristic (see Buxton, column 7, lines 29 – 44).

As per claim 9, which is dependent on claim 1, Kotick and Buxton teach the method of claim 1 (see rejection above). Buxton further teaches that the user interface comprises a graphical user interface for an application program (see Buxton, column 7, lines 1 – 7).

As per claim 10, which is dependent on claim 1, Kotick and Buxton teach the method of claim 1 (see rejection above). Buxton further teaches wherein the user interface comprises a floating palette (see Buxton, column 7, lines 17 – 20).

As per claim 11, which is dependent on claim 1, Kotick and Buxton teach the method of claim 1 (see rejection above). Buxton further teaches wherein the user interface comprises a property browser palette window (see Buxton, column 2, lines 47 – 53).

As per claim 12, which is dependent on claim 5, Kotick and Buxton teach the method of claim 5 (see rejection above). Buxton further teaches wherein the predefined interface comprises a toolbar (see Buxton, column 7, lines 1 – 7).

As per claim 13, which is dependent on claim 6, Kotick and Buxton teach the method of claim 6 (see rejection above). Buxton further teaches wherein the predefined interface comprises a toolbar (see Buxton, column 7, lines 1 – 7).

As per claim 14, Kotick teaches a computer system for providing a selection for formatting properties for an electronic document associated with an application program having a user interface comprising:

A memory for storing a property browser program module; (column 1, lines 50-65; It is inherent that a program module in a workstation uses the system's memory for storing properties) and

Art Unit: 2174

A processing unit functionally coupled to the memory for executing computer executable instruction operable for: (column 1, lines 50-65; It is inherent that a program module in a workstation uses the processing unit for executing computer instruction)

Determining a formatting property for an electronic document associated with the application program, wherein the formatting property has at least one control; (see Kotick, column 5, lines 15-30)

Creating a customized palette with the formatting property including at least one control; (see Kotick column 2, lines 61-67 and column 8, lines 30-35) and

Sending the palette to a user interface associated with the application program for display adjacent to a viewing content area occupied by the electronic document, such that the palette and an activated associated content of the palette do not obscure any portion of the viewing content area occupied by the electronic document regardless of whether the electronic document occupies all portions of the viewing content (figure 3A, items 300 and 320)

However, Kotick fails to teach determining a context for the electronic document and customize palette based upon the context of the electronic document;

Buxton teaches determining a context for the electronic document and customize palette based upon the context of the electronic document; (see Buxton, column 7, lines 59-64)

It would have been obvious to an artisan at the time of the invention to include Buxton's teaching with method of Kotick in order to provide users with a system that adapts to their needs.

As per claim 15, which is dependent on claim 1, Kotick and Buxton teach the method of claim 14 (see rejection above).

Buxton further teaches determining a change in the status of the property or the context of the electronic document (see Buxton, column 8, lines 20 – 25);

based upon the change of the property or the context of the electronic document, modifying the palette to reflect the change in the property or the change in the context of the electronic document (see Buxton, column 8, lines 20 – 25); and

replacing the palette with the modified palette so that the modified palette is displayed in conjunction with the electronic document on the user interface (see Buxton, figure 3A, items 300 and 320 and column 8, lines 20 – 25).

As per claim 16, which is dependent on claim 14, Kotick and Buxton teach the method of claim 14 (see rejection above). Buxton further teaches sizing the palette so that the palette and the electronic document can be simultaneously viewed (see Buxton, figure 3A, items 300 and 320 and column 9, lines 55 – 67).

As per claim 17, which is dependent on claim 15, Kotick and Buxton teach the method of claim 15 (see rejection above).

Buxton further teaches sizing the modified palette so that the palette and the electronic document can be simultaneously viewed (see Buxton, figure 3A, items 300 and 320 and column 9, lines 55 – 67).

As per claim 18, which is dependent on claim 14, Kotick and Buxton teach the method of claim 14 (see rejection above).

Buxton further teaches coordinating the palette with a predefined interface so that the palette and the predefined interface provide consistent control features (see Buxton figure 2, figure 3A, items 300 and 320 and column 6, lines 43 – 58); and

displaying the predefined interface in conjunction with the palette and the electronic document (see Buxton figure 3A, items 300 and 320).

As per claim 19, which is dependent on claim 15, Kotick and Buxton teach the method of claim 15 (see rejection above).

Buxton further teaches coordinating the modified palette with a predefined interface so that the palette and the predefined interface provide consistent control features (see Buxton figure 2, figure 3A, items 300 and 320 and column 6, lines 43 – 58); and

displaying the predefined interface in conjunction with the modified palette and the electronic document (see Buxton figure 2, figure 3A, items 300 and 320 and column 6, lines 43 – 58).

As per claim 20, which is dependent on claim 14, Kotick and Buxton teach the method of claim 14 (see rejection above).

Buxton further teaches that the context of the electronic document consists of at least one of the following:

Art Unit: 2174

textual content, formatting content, or graphical content (see Buxton, column 8, lines 30 – 36).

As per claim 21, which is dependent on claim 14, Kotick and Buxton teach the method of claim 14 (see rejection above).

Buxton further teaches that the property consists of one of the following: a formatting command, an application program command, or an electronic document characteristic (see Buxton, column 7, lines 29 – 44).

As per claim 22, which is dependent on claim 18, Kotick and Buxton teach the method of claim 18 (see rejection above).

Buxton further teaches that the user interface comprises a graphical user interface for an application program (see Buxton, column 7, lines 1 – 7).

As per claim 23, which is dependent on claim 18, Kotick and Buxton teach the method of claim 18 (see rejection above).

Buxton further teaches wherein the user interface comprises a floating palette (see Buxton, column 7, lines 17 – 20).

As per claim 24, which is dependent on claim 18, Kotick and Buxton teach the method of claim 18 (see rejection above).

Art Unit: 2174

Buxton further teaches wherein the user interface comprises a property browser palette window (see Buxton, column 2, lines 47 – 53).

As per claim 25, which is dependent on claim 18, Kotick and Buxton teach the method of claim 5 (see rejection above).

Buxton further teaches wherein the predefined interface comprises a toolbar (see Buxton, column 7, lines 1 – 7).

As per claim 26, which is dependent on claim 19, Kotick and Buxton teach the method of claim 6 (see rejection above).

Buxton further teaches wherein the predefined interface comprises a toolbar (see Buxton, column 7, lines 1 – 7).

As per claim 27, it is of similar scope to the combination of claims 14, 15, 17, 18 and 22 and is rejected under the same rationale as claims 14, 15, 17, 18 and 22 (see rejections above).

### ***Response To Argument***

Applicant's arguments with respect to claims 1-27 have been considered but are deemed to be moot in view of the new grounds of rejection.

### ***Contact Information***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peng Ke whose telephone number is (571) 272-4062. The examiner can normally be reached on M-Th and Alternate Fridays 8:30-5:00.

Art Unit: 2174

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kristine L. Kincaid can be reached on (571) 272-4063. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
